EXECUTIVE SUMMARY

Performance-driven Mechanical Engineering candidate with over 18 months of hands-on experience across product design, simulation and manufacturing. Proficient in taking concepts from initial functional requirements through GD&T tolerance stack-up analysis, DFM/DFA optimization, and rapid prototyping. Distinguished by exceptional technical aptitude, fast adaptability, and proven cross-functional leadership as Vice President of the Student Council. **Multilingual** in Arabic (Native), English (C1), French (B2), and Spanish (A2), enabling seamless collaboration across international engineering teams. Seeking a 6-month final-year internship (PFE) starting in January or February 2027.

CORE TECHNICAL COMPETENCIES

- **Parametric CAD & Design Engineering:** CATIA V5, SolidWorks, PTC Creo, Autodesk Fusion 360, Complex Surface Modeling, Multi-Body Assemblies, Design for Manufacturability & Assembly (DFM/DFA).
- **Engineering Analysis & Simulation:** ANSYS Mechanical (Linear/Non-linear Static FEA), Structural Stress & Displacement Analysis, Snap-Fit Mechanics, Kinematic & Dynamic Calculations.
- **Manufacturing & Production Release:** GD&T (ISO/ASME Standard Drafting), Tolerance Stack-Up Analysis, Bill of Materials (BOM) Generation, 3-Axis CNC CAM Programming (G-Code), FDM/Additive Prototyping, Laser Fabrication.
- **Process Automation & Tools:** Excel/VBA CAD Automation, Odoo ERP Process Management, Technical Documentation, Lean Workflow Standardization.
- **Language Proficiency:** Arabic (Native), English (C1 - Advanced/Professional), French (B2 - Upper-Intermediate), Spanish (A2 - Elementary).

PROFESSIONAL ENGINEERING EXPERIENCE

TE CONNECTIVITY — Product Engineer (Internship - Tangier) *Jul 2026 – Sep 2026*

- Led functional analysis, concept selection and structural redesign of external locking systems.
- Assessed snap-fit stresses and male retention forces through ANSYS simulations.
- Built an Excel/VBA **Cost Estimation** tool and estimated the ROI over a year.

GUIDE VALVE LIMITED — Mechanical Design Engineer (Freelance - Canada) *Feb 2026 – Nov 2026*

- Designed fully constrained 3D parametric models of industrial valve assemblies with 150+ interdependent components.
- Produced manufacturing drawing packages with ASME GD&T, fit-class allocations and detailed BOMs for shop-floor use.
- Built Excel/VBA scripts linking parametric CAD models and automating repetitive exports, reducing design-configuration.

MOBDIE — Design & Prototyping Engineer (Part Time - Fez) *Mar 2026 – Jun 2026*

- Developed functional electromechanical systems for educational use
- Designed CAD components, prepared DXF, STL files and manufactured parts through laser cutting and 3D printing (FDM)

FLYSON — Process Optimization Engineer (Internship - Casablanca) *Aug 2025 – Sep 2025*

- Mapped agricultural-drone spraying workflows, identifying bottlenecks, energy use and turnaround delays.
- Set up Odoo tracking and standardized maintenance routines; reported a 60% reduction in mission-preparation time.

UEMF ADVANCED MANUFACTURING LAB — Design & Manufacturing Engineering (Part Time Internship - Fez) *Feb 2025 – Jul 2025*

- Engineered and built a physical powder-flowability test bench compliant with ASTM B213 standards, integrating CNC machined aluminum structural elements and additive components.
- Programmed 3&5-axis CAM toolpaths and G-code in Fusion 360 to machine high-precision spherical molds.
- Performed preventive maintenance on lab pneumatic equipment.

EDUCATION & ADVANCED ACADEMIC PROJECTS

EUROMED UNIVERSITY OF FES (EPS-UEMF) — Mechanical Engineering degree in progress *Fes, Morocco | Expected 2027*

- **Aircraft Fuselage Structural FEA Optimization:** Engineered parametric fuselage section models; executed finite element stress/strain simulations in ANSYS Mechanical to drive structural mass-reduction design iterations.
- **Biomedical Cranial Implant & Mold Conception:** Reconstructed organic surface geometry from 3D anatomical point-cloud scans; developed custom retention interfaces and designed a split mold assembly for mechanical strength testing.

EXECUTIVE LEADERSHIP & EXTRACURRICULARS

UEMF STUDENT COUNCIL — Vice President *2024 – 2025*

- Co-managed university student governance body, allocated departmental budgets, and directed university-wide technical and cultural events.

AIESEC FES — Member Experience Manager *2022 – 2025*

- Directed talent onboarding, performance KPIs, and leadership development workshops across cross-cultural exchange teams.
